

**ChildFirst**

power by Social Manish Association

## **ChildFirst:**

ChildFirst is a dedicated program of the SocialManish Association focused on the holistic development of children, particularly those facing adversity such as child labour, street life, or vulnerability. The program strives to create a nurturing environment where every child can grow, learn, and thrive.

Through in-depth research and active community engagement, ChildFirst addresses pressing social issues affecting children, advocates for sustainable solutions and mobilises resources to protect and support them.

The program employs a multi-dimensional approach, including creating awareness through literature, videos, and storytelling, conducting workshops, seminars, and outreach initiatives, and fostering resilience through training and collaborative projects.

The program's mission is to empower children and ensure their rights and needs are met, paving the way for a just and equitable society.
